

Double-sided billboard with a very stable concrete foundation that is perfect for parking environments and access roads.

The aluminum frames are equipped with snap profiles for quick and easy message changes that the staff can make themselves, completely without the need for ladders with the help of an opening tool. The stand-alone billboard is now a proven standard product for outdoor display where the most common image size is 3200 x 1590 mm. As an accessory, there is our energy-efficient lighting luminaire with LED with very good light scattering which significantly increases visibility.
