

Our LED fixture is adapted for signs, entrances and facades. The fixture is made of extruded aluminum profile and with LED fluorescent lamps adapted for the outdoor environment. The lens hood is made of plexiglass, which guarantees a long and trouble-free life. The product works excellently both on free-standing billboards and when you want to illuminate wall-mounted signs or textile banners. The fixture is available in lengths up to 5 meters and for larger lengths, several luminaires are mounted side by side.

Dimensions 2000 mm, 3200 mm and 5000 mm .

Single / double sided One-sided. On double-sided billboards, one luminaire per side is needed

Material Extruded aluminum and plexiglass
