

The menu box has been developed for several years and is a flat, double-sided menu system with LED lighting. The unique design makes it easy to rotate the menu sign when the restaurant wants to change its menu during the day. The pictures are under a magnetic front plastic fitted with a passport. The plastic is taped in the menu box in the upper part and with magnets in the lower part of the menu box. Only the magnetized part needs to be opened, we change the image. Can be mounted built into a wall or mounted surface-mounted.

Image size 55,5 x 115 cm

Weight about 20 kg

Single / Double Sided Double-sided reversible
